

Vehicle testing gets cheaper and indigenous

VRDE Ahmednagar gets India's first EMC centre

THE UNION MINISTER FOR HEAVY industries and public enterprises, Vilasrao Deshmukh recently inaugurated the country's first Automotive Electromagnetic Compatibility (EMC) testing centre at the Vehicle Research and Development Establishment (VRDE) centre in Ahmednagar. The centre will provide EMC testing facilities to Indian automobile manufacturers at approximately Rs 3 lakh as opposed to the Rs 50 lakh they had to pay abroad till now. The EMC test is a standard test for measuring the emission of

electromagnetic radiation from electronic parts and its impact on other equipment. The test studies the unintentional generation, propagation and reception of electromagnetic energy with reference to the unwanted effects that such energy may induce. According to VRDE officials, the centre has a semi-anechoic chamber, a chassis dynamometer on a turntable, instrumentation for radiated and conducted emission/immunity, a bulk current injection system, a generator, strip-line testing and on-board transmission testing.

The Complete Automotive Show
— Silver Jubilee Year —

2010 Auto Expo dates announced

Slated to be the biggest expo ever

CELEBRATING ITS SILVER JUBILEE YEAR, the 10th Auto Expo will be held from the 5th to the 11th of January 2009 in Pragati Maidans, New Delhi. This automotive event takes place every two years and is the best platform for automobile manufacturers from not only India but around the world to showcase their latest products and concept

vehicles to the masses. The Auto Expo is the biggest automotive show in India and one of the biggest in Asia. For 2010, the show will be spread over an area of 1,40,000 square meters and will witness participation from 2,100 small and big automotive companies. For more information, log onto www.autoexpo.in

Aeroaids Com-Paint: India's first touchup spray paint

Now say goodbye to expensive scratches

NO MATTER HOW MUCH WE take care of our beloved cars, some scratches inevitably crop up, especially while driving in the city. Aeroaids Corporation has introduced Com-Paint, India's first touchup paint, a completely do-it-yourself kit that promises to lessen the time consuming process of scratch removal. The kit comes in an aluminium aerosol can that reduces wastage of time while ensuring quick and effective removal of scratches. Just spray a layer of the acrylic solution and watch scratches disappear in the blink of an eye. Com-Paint is available for almost all paint colours in the Indian car market.

Elofic's new plant commissioned

The facility establishes Elofic as a major manufacturer of filters

ELOFIC, A WELL-KNOWN manufacturer of filters for various automotive applications, has commissioned its new plant at Nalagarh. The firm has equipped the new plant with state-of-the-art technologies and machines to manufacture a new generation of advanced filters for the discerning automobile market. The product lineup includes the latest environment friendly

Eco filters, advanced spin-on, STF and air filters. The plant also boasts its own press shop for in-house quality control of metallic components thereby increasing the reliability of its products. This new facility will supplement Elofic's existing Faridabad plant. Elofic, which is already into greases, will also be launching lubricating oils, long life greases and silicon gaskets shortly.
