

AUTO EXPO

NEWS

GLOBAL PLATFORM FOR FUTURE TECHNOLOGIES & INNOVATION

FOR PRIVATE CIRCULATION ONLY | OFFICIAL NEWSLETTER OF 16TH AUTO EXPO | ISSUE No. 1 | JAN 12, 2023

The Grand Show Begins

The 16th Auto Expo Components Show, with a record 20,000+ pre-registered business visitors from 65 countries has sparked a lot of excitement. The show is set to become a milestone in reinvigorating businesses to innovate for a better future of mobility and push India closer towards its \$5 trillion dream by 2025

The Auto Expo Components Show 2023, which will take place in a physical format after three years at the newly opened Pragati Maidan, has generated a great deal of interest. With six countries setting up pavilions and 800 companies and business delegations from 15 countries attending the event, the emphasis is on innovation and the creation of new business synergies

The Auto Expo 2023-Motor Show saw a slew of new launches at India Expo Mart in Greater Noida on January 11 with Bollywood actor Shah Rukh Khan stealing the limelight as he unveiled Hyundai's all-electric SUV IONIQ5

AUTO EXPO COMPONENTS INDEX

800+ EXHIBITORS

200 COMPANIES LAUNCHING NEW PRODUCTS

1400 NEW PRODUCTS ON DISPLAY

20,000 REGISTERED BIZ VISITORS

100,000 EXPECTED FOOTFALL

65 COUNTRIES (DELEGATES)

15 COUNTRY DELEGATIONS

60,000 SQ MTS OF EXHIBITION AREA

LEADERS SPEAK

In the backdrop of strong economic recovery and rising vehicle sales in the country, the Auto Expo 2023-Components Show is expected to create newer opportunities for the components industry as also provide a platform to showcase its prowess as it strives to stay relevant in a fast-transforming sector.

Sunjay Kapur
President, ACMA & Chairman, Sona Comstar

With significant disruptive changes being witnessed in the automotive ecosystem the world over and in India, the Auto Expo 2023-Components Show will be reflective of these dominant trends including electric mobility, ADAS, biofuel & flex-fuel based engine technologies, vehicular safety technologies, sustainable & ecologically sound manufacturing practices.

Vipin Sondhi
Chairman, CII National Committee on Future Mobility and Battery Storage

India has risen to become the fifth largest economy in the world, with ambitions of becoming a \$5 trillion economy by 2025. The Indian auto component sector, which is the most competitive and innovative in the world, will be critical in realising India's aim of being a self-sufficient nation.

Chandrajit Banerjee
Director General, CII

Auto Expo has evolved into a premier event for showcasing India's potential in manufacturing technology, innovation, and the competitiveness of the auto component sector. One of the major features of the events' 16th edition will be launch of over 1400 new products and technologies from 200 companies.

Vinnie Mehta
Director General, ACMA

Bigger, Better and Smarter

The Auto Expo-Component Show 2023 is being held at a time when the Indian auto component sector is on the cusp of transformation owing to technical advances and a shift in emphasis toward clean and efficient energy use. This edition of the show will bolster India's efforts toward this goal while demonstrating the country's prowess as a preferred destination for global component manufacturers

The 16th Edition of Auto Expo 2023, returning in a physical format after a three-year hiatus, is set for a grand opening today with an overwhelming response from participants from over 800 companies from 15 countries, displaying their products and cutting-edge innovations in an exhibition area spread across 60,000 sq mts at Pragati Maidan, New Delhi.

This year's Components Show is bigger than previous editions, as evidenced by the fact that the show's organizers—Automotive Component Manufacturers Association of India (ACMA), Confederation of Indian Industry (CII), and Society of Indian Automobile Manufacturers (SIAM)—have seen more than 20,000 business visitors pre-register. From January 12 to 15, the Components Show is projected to attract over 100,000 attendees from 65 nations, including businessmen, government officials, diplomats, and members of the media.

Themed, 'Technovation-Future Technologies & Innovations', six countries—France, Germany, Japan, Poland, South Korea, and United Kingdom—have set up international pavilions at the show. The other focused Pavilions include EV Components, Innovation & Start-Ups; ACMA Safer Drives, ACMA Industry Services, Bearings Pavilion, Garage Equipment Pavilion and REA, Gujarat State Pavilion.

Sharing the highlights of the show, Sunjay Kapur, President, ACMA &

Chairman, Sona Comstar said, "I am delighted that the 16th edition of Auto Expo 2023 - Components, the most awaited event of the automotive industry, has shaped very well. With participation from over 800 companies, several of them from overseas, we have been completely sold out. With confirmation of several business and sourcing delegations, the event will provide an ideal opportunity for networking, striking international partnerships and gaining insights into the future of mobility."

THE GROWING POWER OF AFTERMARKET

ACMA Aftermarket Summit, which was organised on January 11 at The Grand Highlighting some of the critical issues related to India's automobile sector. The key discussion points at the summit involved how COVID pandemic has pushed the growth of aftermarket vehicles in India, making it the fastest-growing market in the world. From the dealer's perspective, margins are higher in aftermarket vehicles, on the other hand the demand for used vehicle is growing strong because of rising prices of new vehicles.

The experts also pointed out that the shortage of semiconductors is also delaying delivery of new vehicles, which is playing a crucial role in people preferring aftermarket vehicles.

The Excitement is Palpable

As the 16th edition of Auto Expo Component Show begins with a sharp focus on innovation and technology, the excitement is very palpable, says Sunjay Kapur, President, ACMA & Chairman, Sona Comstar, as he highlights various new opportunities emerging in a changing global automotive industry

Sunjay Kapur

President, ACMA & Chairman,
Sona Comstar

The expected footfall in this year's edition of Auto Expo Components Show is 100,000 visitors. How does it compare to the previous edition?

In the last edition, we had 110,000 visitors. And this time, we are expecting one lakh plus. It is pretty much similar, but I guess the excitement is very palpable. Interestingly, the kind of queries that we are getting for registrations is enormous. So I'm very confident that this time the numbers will be over 1,10,000. But as an association, you're always a little conservative, we always love the element of surprise.

How much investments has the automotive component space seen in the last one year? And how do you look at the semiconductor chips situation? And what would your strategy going ahead?

I think it is difficult to calculate the quantum of investments because we're about 850 member companies and their investment cycle or the capex cycle has kicked in. We're seeing a lot of investment go towards future technologies. There is a bit of investment which goes into current capacity. And because the volumes have increased specifically in the passenger car and commercial vehicles, we're seeing the capex cycle kick in as well.

With regard to semiconductors, we're seeing some ease in terms of supply. But I can't tell what will happen going forward. There is capac-

ity that's been installed across the globe, and we will see that capacity increasing. However, even the requirement for semiconductor chips has been increased. As an automotive industry, we have about 7% of output, we will probably go to 20% and similar things will happen with other industries. So it's a matter of really managing the capacity.

As an automotive industry body, could you tell us how is the work on the ultimate goal of carbon neutrality going on?

Importing electronics is still a challenge and will continue to be because as vehicles are transforming and the disruption kicks in. The government of India as well as OEMs are working on localizing electronics, which is going to be a key factor for growth of the auto industry. Localization of electronics has to happen.

What's the kind of interest that the global industry has in sourcing from India or in partnerships with India? And what are we doing to be a bigger part of the global supply chain?

Sourcing has increased, and that's sort of evident by the increase in export that has increase to \$90 billion. And that just shows that there is a lot of global interest in India. When you look at China plus one and Europe plus one, we're actually seeing that happen. A lot of investments that are coming are large volume investments. There is a lot of focus in terms of sourcing of all kinds of components. There is a lot of opportunity for technology partnerships. Even ACMA is going to Japan or UK, US, Germany, and having a lot of meetings with a lot of different companies to attract partnerships.

The Government of India as well as OEMs are working on localizing electronics, which is going to be a key factor for growth of the auto industry. Localization of electronics has to happen

POLICY PUSH FOR COMPONENTS GROWTH

The Government of India's Automotive Mission Plan (AMP) 2006-2026 has come a long way in ensuring growth for the sector

The PLI scheme in automobile and auto components has been approved with a financial outlay over a five-year period of US\$ 8.1 billion

Government's policy push expected to push auto industry's share in the country's GDP to over 12%

Around 65 million incremental number of direct and indirect jobs will be created as a result of government policy support

The Vehicle Scrapage Policy has been launched by Prime Minister Narendra Modi and soon the End of life Policy will be implemented for old vehicles

Product Innovations for Future-Ready Mobility

Auto Expo Components Show has evolved as the preferred forum for showcasing and launching future-ready innovations, which are a significant differentiator for the Indian component sector. The 16th edition of the event will feature the introduction of up to 1,400 new products and technology from 200 businesses across the component spectrum, highlighting component manufacturers' inventive intuition and readiness for future mobility solutions

Global Players at 16th Auto Expo

The Auto Expo Components Show has grown dramatically in size over the last few years, transforming itself into a global event. This edition is no exception, with at least six countries establishing pavilions at the exhibition to demonstrate cutting-edge technology and solutions while also providing networking and collaboration possibilities for Indian firms

Tech Meets Innovation

Explore the creatively crafted products and solutions to take auto industry to the next level of evolution

Eight Things to Look Forward to At Auto Expo Components Show

1

Networking

The Auto Expo 2023 Components Show will organise forums like Matchmaking Event and SIAM Sourcing Group Meeting to engage the business community to conduct meaningful discussions and initiate dialogues for future businesses, with an objective to bring the best technologies to the Indian Automotive Manufacturing sector.

5

SME FOCUS

Auto Expo 2023 Components Show has a large presence of SMEs in the component manufacturing space, showcasing India's potential as a preferred outsourcing destination for Components manufacturing for the global automotive market. The exhibition is aimed at helping and facilitating the SME sector to become the sustainable components manufacturing segment in India.

2

Concurrent Events

Events such as the ACMA Aftermarket Summit, ACMA Global Summit & Automotive Technology Partnership Summit & Expo (ATPSE), ACMA IPO Forum, ACMA-AIWA Conference on Spare Service Support in a Changing Environment, and Stakeholders Awareness cum Consultation Workshop for Develop are being held concurrently during the Components Show.

6

EV Focus

Some of the new products being launched and on display at Auto Expo 2023-Components Show include E Autos; E-Rikshaw; E-Cycles; E Scooters; E-Loader; Fasteners for EVs; Aluminium Cylinders & Machined Parts; Components for Electric Two Wheelers; Gasoline EGR Coolers; Battery Cooling Tubes; Heavy Duty Stab Bar; DCT Motors; Traction Motors; E Cooling Fan Motor; E Scooter Motor, etc.,

3

Technovation

The theme pavilion 'Technovation' is designed to be a crystal-ball of future of mobility, showcasing cutting-edge technology offerings from our domestic companies. The Auto Expo 2023 Components Show will be reflective of dominant trends including electric mobility, ADAS, biofuel & flex-fuel based engine technologies, vehicular safety technologies, sustainable & ecologically sound manufacturing practices, digitisation.

7

New Products

The participants at the Components Show are using this platform to showcase their new product offerings to the Automotive World. One of the highlights of this edition is that around 200 participants are launching/displaying over 1400 new products and technologies, which will be on offer to the Automobile Manufacturers to include in their plan to make smarter and sustainable vehicles for future.

4

Special Initiatives

The special initiatives like EV Components Pavilion, ACMA Innovation & Start-Up Pavilion, will provide an opportunity for the Innovators, start-up companies and large R&D Organisations of global manufacturers to come together under a common platform and deliberate on the continuous efforts of Indian Automotive Industry for a sustainable future mobility for India.

8

Business Delegations

Business Delegations from Africa, Bhutan, Bangladesh, Canada, Japan, Jordan, LATAM, Nepal, Russia, Spain, Russia, UK, and USA, etc., have confirmed to visit Auto Expo 2023 – Components Show.
